Cement for China

A good cement for mending china is made in the following way: Make a very thick solution of gum arabic and warm water and stir in a sufficient quantity of plaster of paris to make a thick paste; then, with a small brush, apply the paste very carefully to the fractured edges of the chins, pressing them tightly together, and leave the mended dish untouched for two or three days.

Orchid Tea.

It appears that Frenchman have been drinking orcuid tea for fity years, and that the consumption of this expensive delicacy has much increased of late. The ording from which the ten is made is a member of one o the handsomest and most expensive families, the Argroccum. It grows in the forests of Bourbon and Mauritiu, and the scientific know it as Argroccum tragrams. The commore al virtue of the plant lies in the strong perfume of its leaves.

The genus is allied to vanilla, and it is only necessary "to touch the fresh leaves for the angers to remain impregnated with the aroma," which remains after the leaves have been dried. This process is very simple, ap parently. No heat is applied and no coloring

The decoction is equally easy. You just lay the leaves and stalks in cold water, about one gramme to a tescap-more or less, according to taste-close the vessel tight and boil for ten minutes. The ten may be sweetened, and milk and rum bring out the flavor of the vanilla more strongly. It is as good cold as hot, and may be warmed up without deterloration. Material enough for fifty cups is sold in Parts for 2 france 50 centimes. It is called Fanam, as in Mauritius.

Turpentine.

Turpentine has almost as many uses in the ouse as borax. It is good for rheumatism and, mixed with camphorated oil and rubbed on the chest, one of the best of remedies for branchial colds. It is an excellent preventive against moths, although naphtha is preferable, the odor leaving much sooner. It will drive away ants and reaches if sprinkled about the shelves and closets. A spoonful of it to a pail of warm water cleans paint excellently, and a little in the boiler on washing day whitens the clothes.

The Feminine Foot.

The French sculpter, Louis Xavier, now is easy to get an almost perfect model. Perlectly formed women are by no means rares with the exception-the feet. A beautiful bare toot is almost unknown. We have to thank the fashionable boot for this. When women learn that a small foot out of propor tion to the body and much smaller than the hand is a deformity a new era of sense may egin, and a foot Greek in contour with rosy nails be as common as a beautiful arm or throat." When will that day be? Not until it is fashionable to walk bareloot, I tancy.
